

Window Rdp Connection:

Create new local user

Open cmd with administrator access

Run:

net user devuser blazor3D@123 /add

```
Administrator: C:\Windows\system32\cmd.exe
Microsoft Windows [Version 10.0.20348.4171]
(c) Microsoft Corporation. All rights reserved.

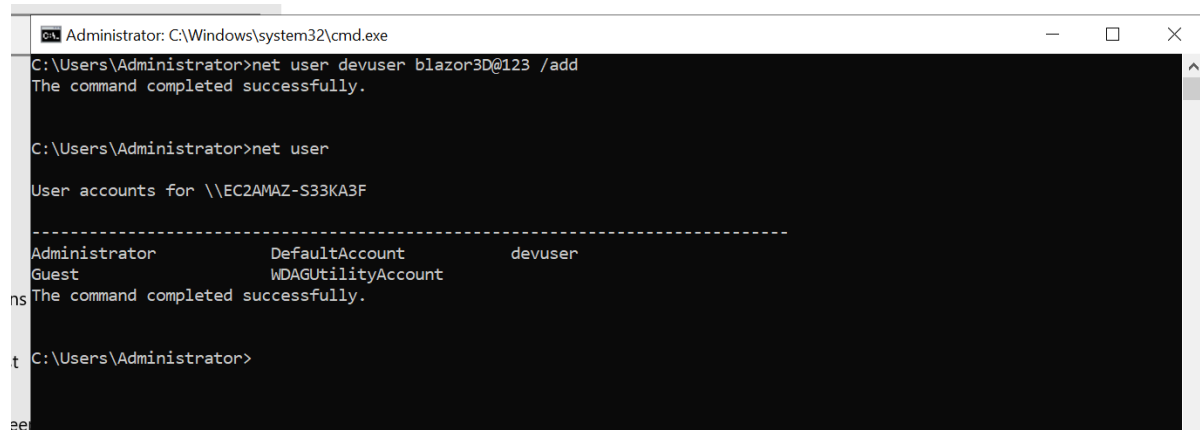

C:\Users\Administrator>net user devuser 1234@1234 /add
The password does not meet the password policy requirements. Check the minimum password length, password complexity and password history requirements.

More help is available by typing NET HELPMSG 2245.

C:\Users\Administrator>net user devuser blazor3D@123 /add
The command completed successfully.

C:\Users\Administrator>
```

Test User:

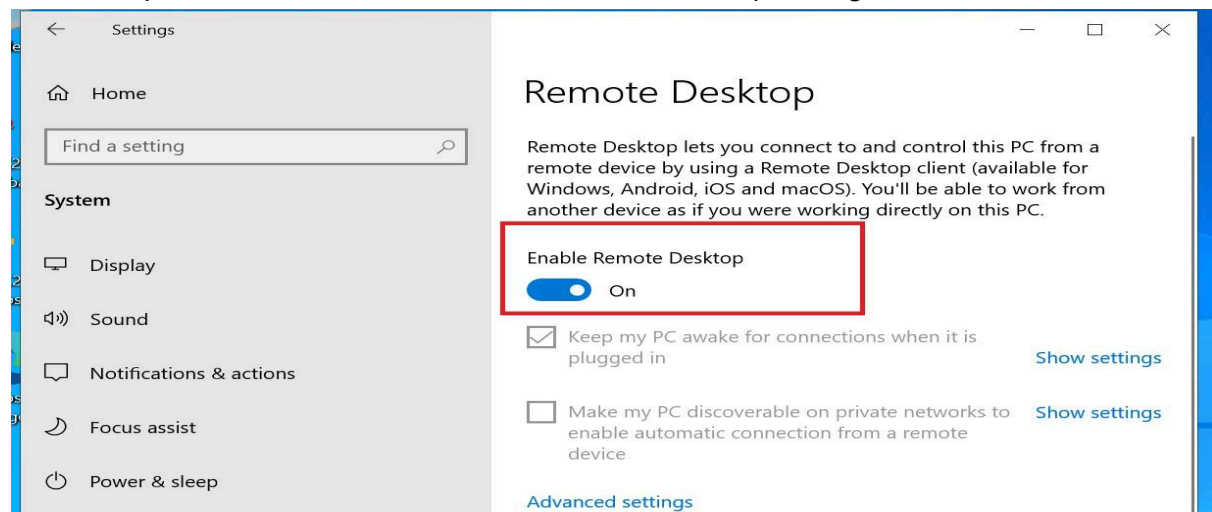

```
Administrator: C:\Windows\system32\cmd.exe
C:\Users\Administrator>net user devuser blazor3D@123 /add
The command completed successfully.

C:\Users\Administrator>net user

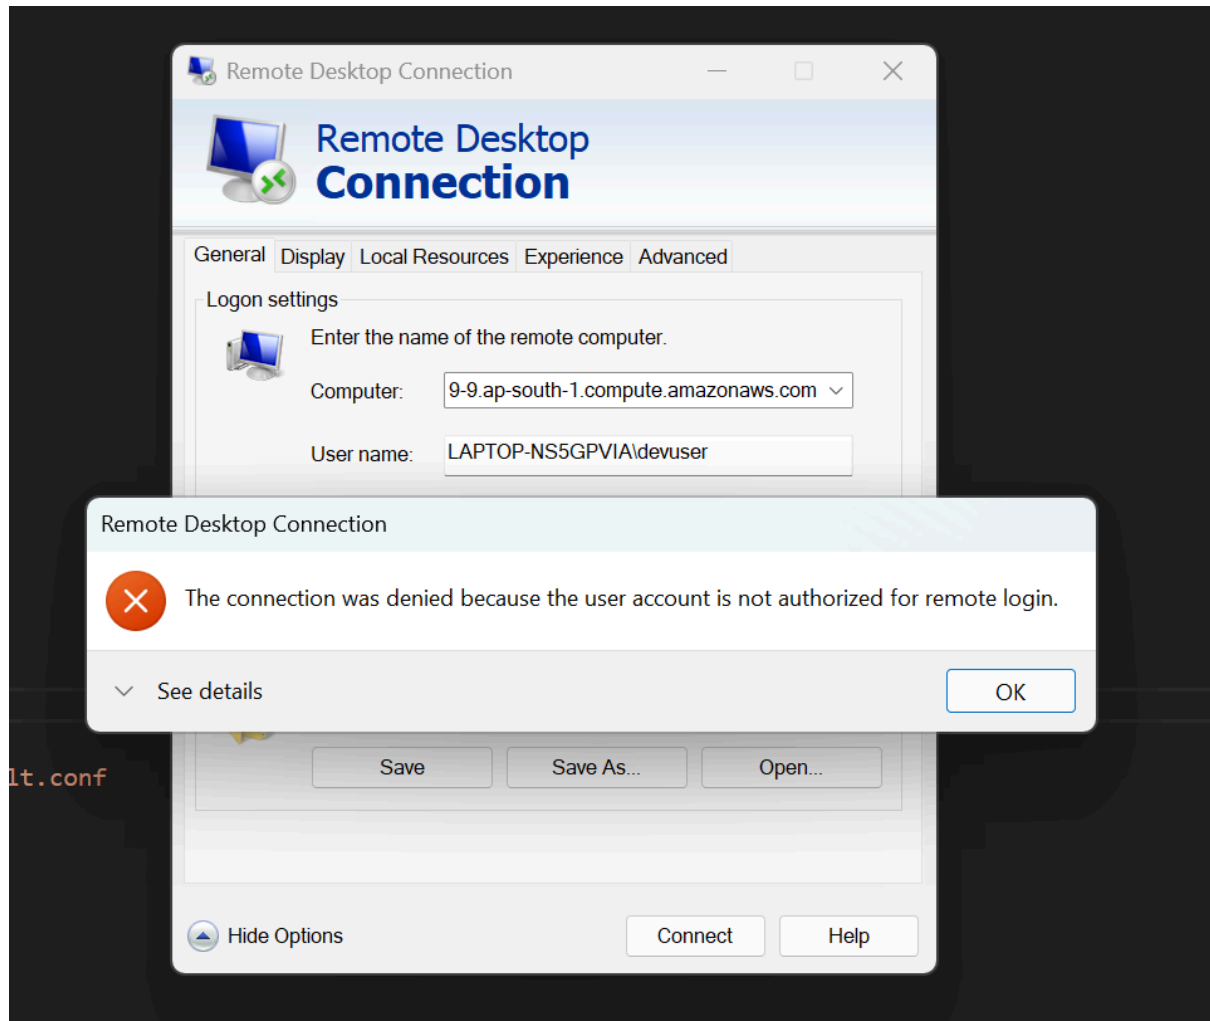

User accounts for \\EC2AMAZ-S33KA3F

Disable Admin Rdp:

Get Error:

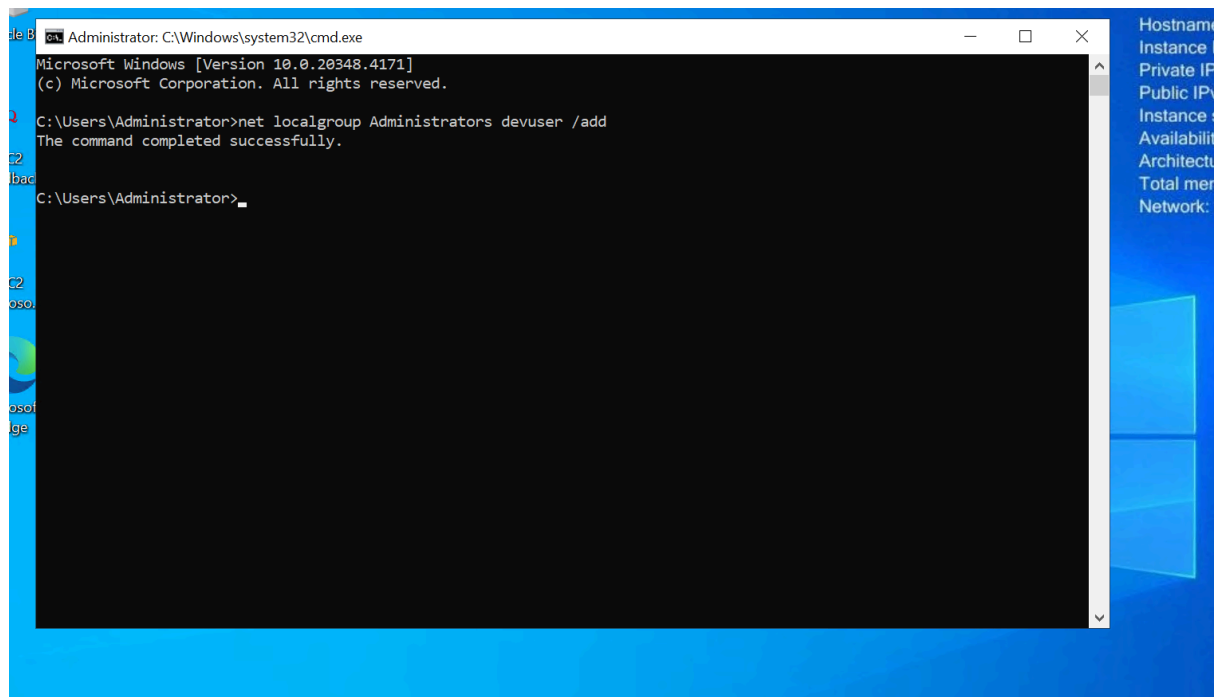

Rdp as administrator and add this user to the administrator group: ( we need to do this because when we disable rdp for admin then with this user we can perform admin tasks)

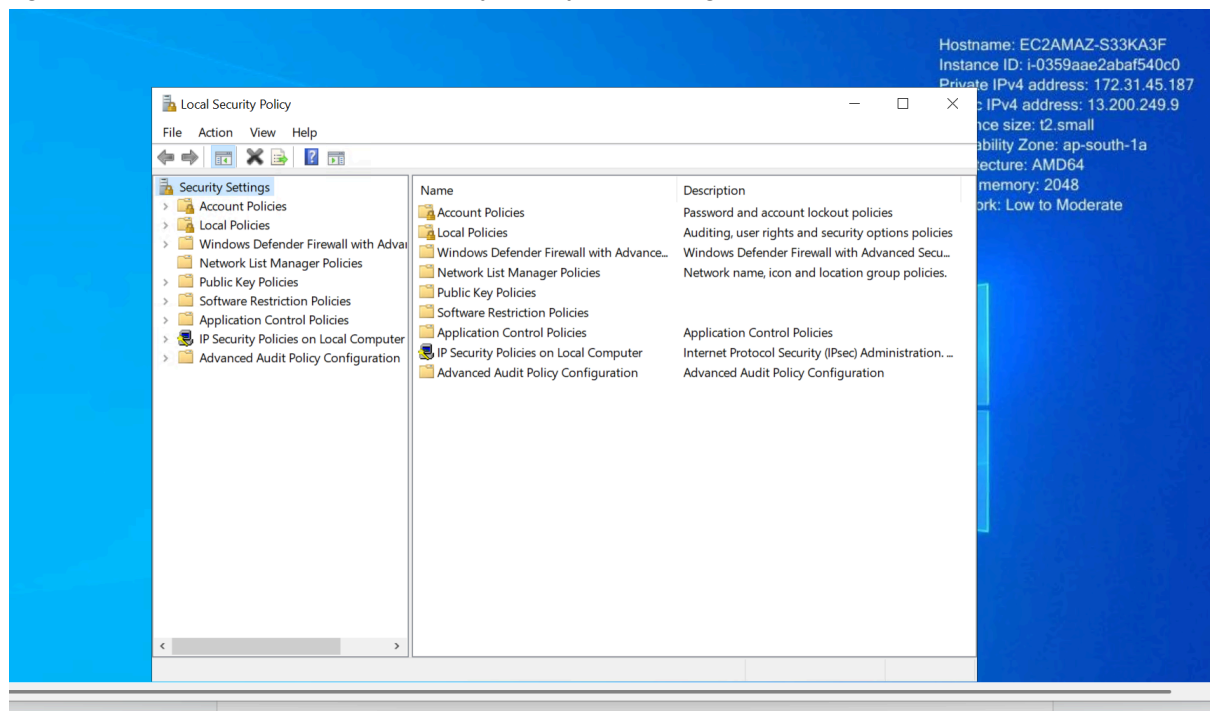

Run:

```
net localgroup Administrators devuser /add
```

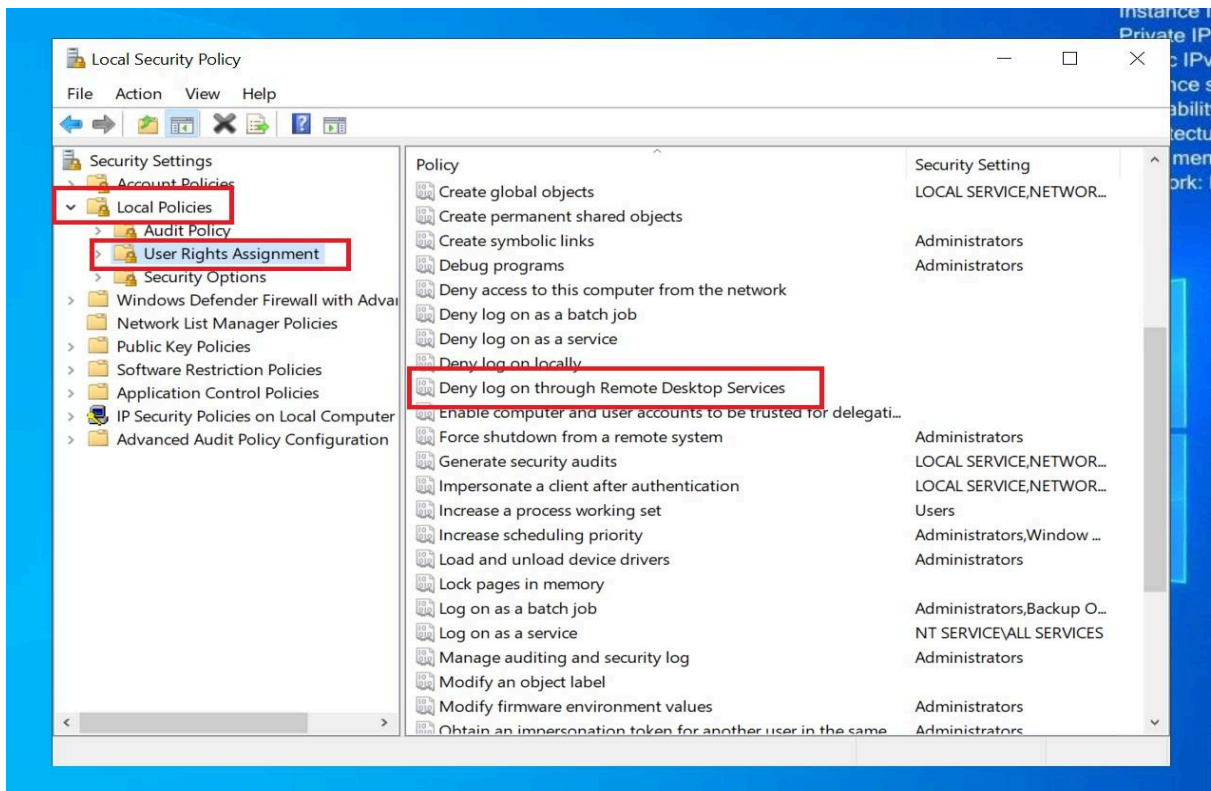

Again rdp as that user (Local Security Policy is working):

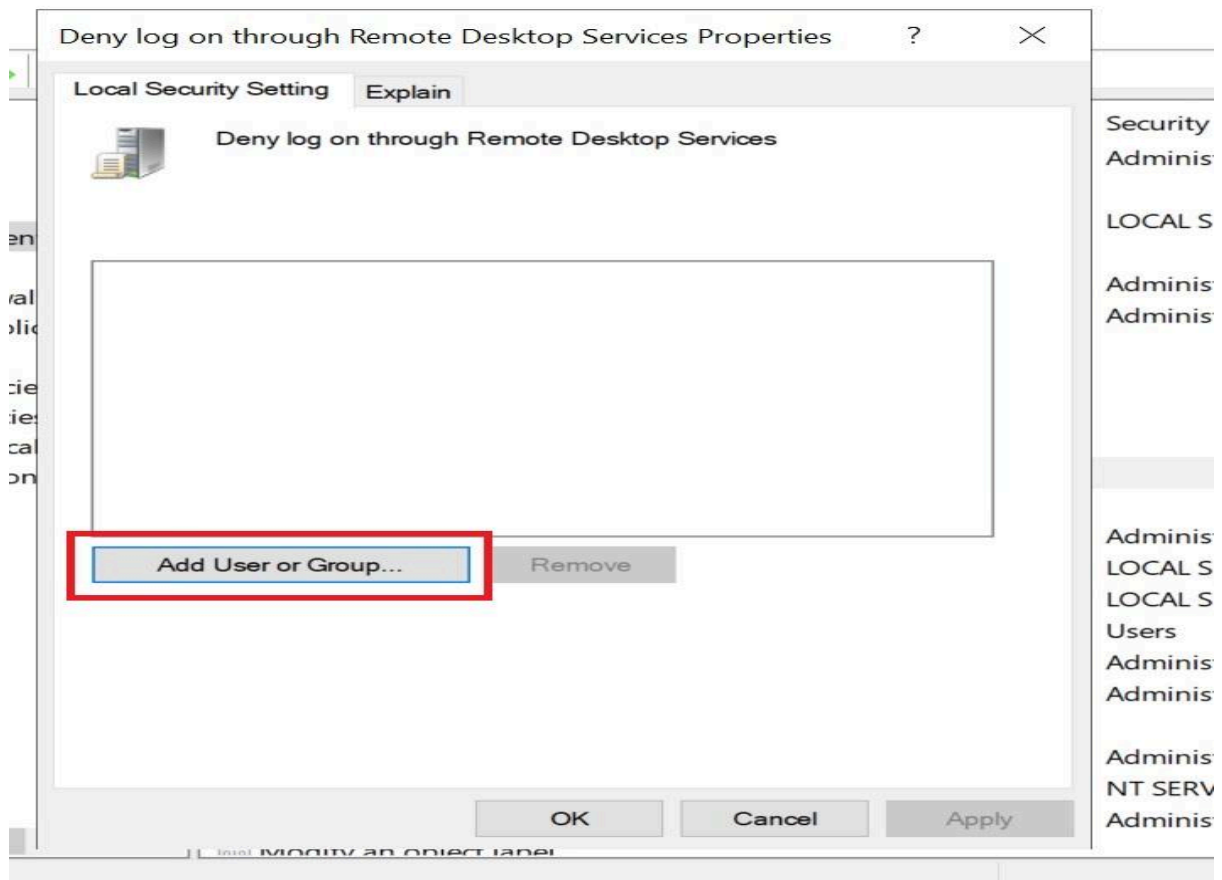

Select Deny log on through Remote Desktop Services:

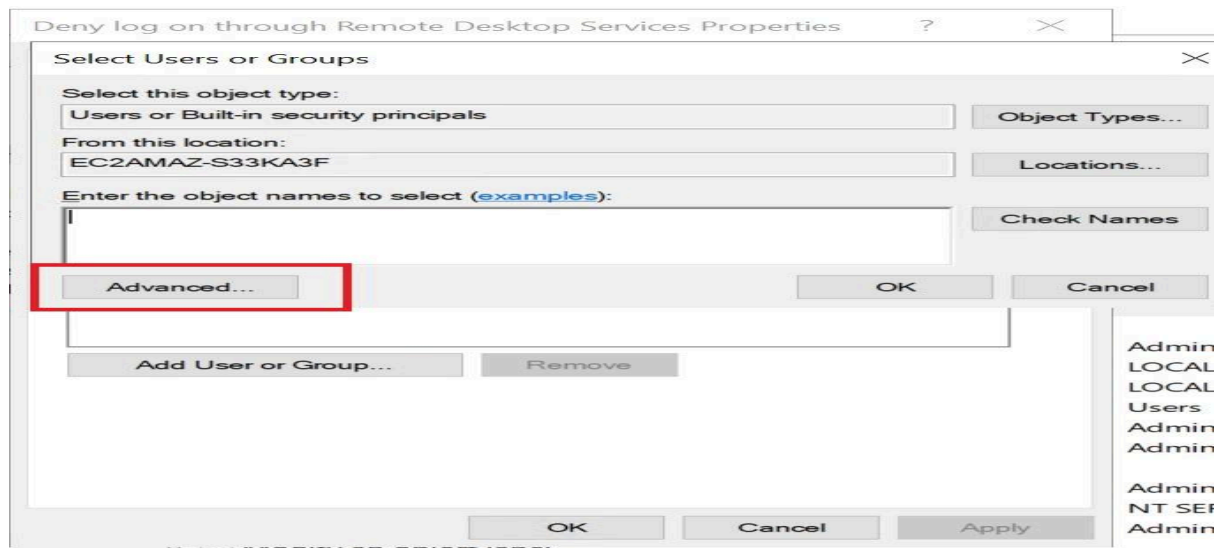

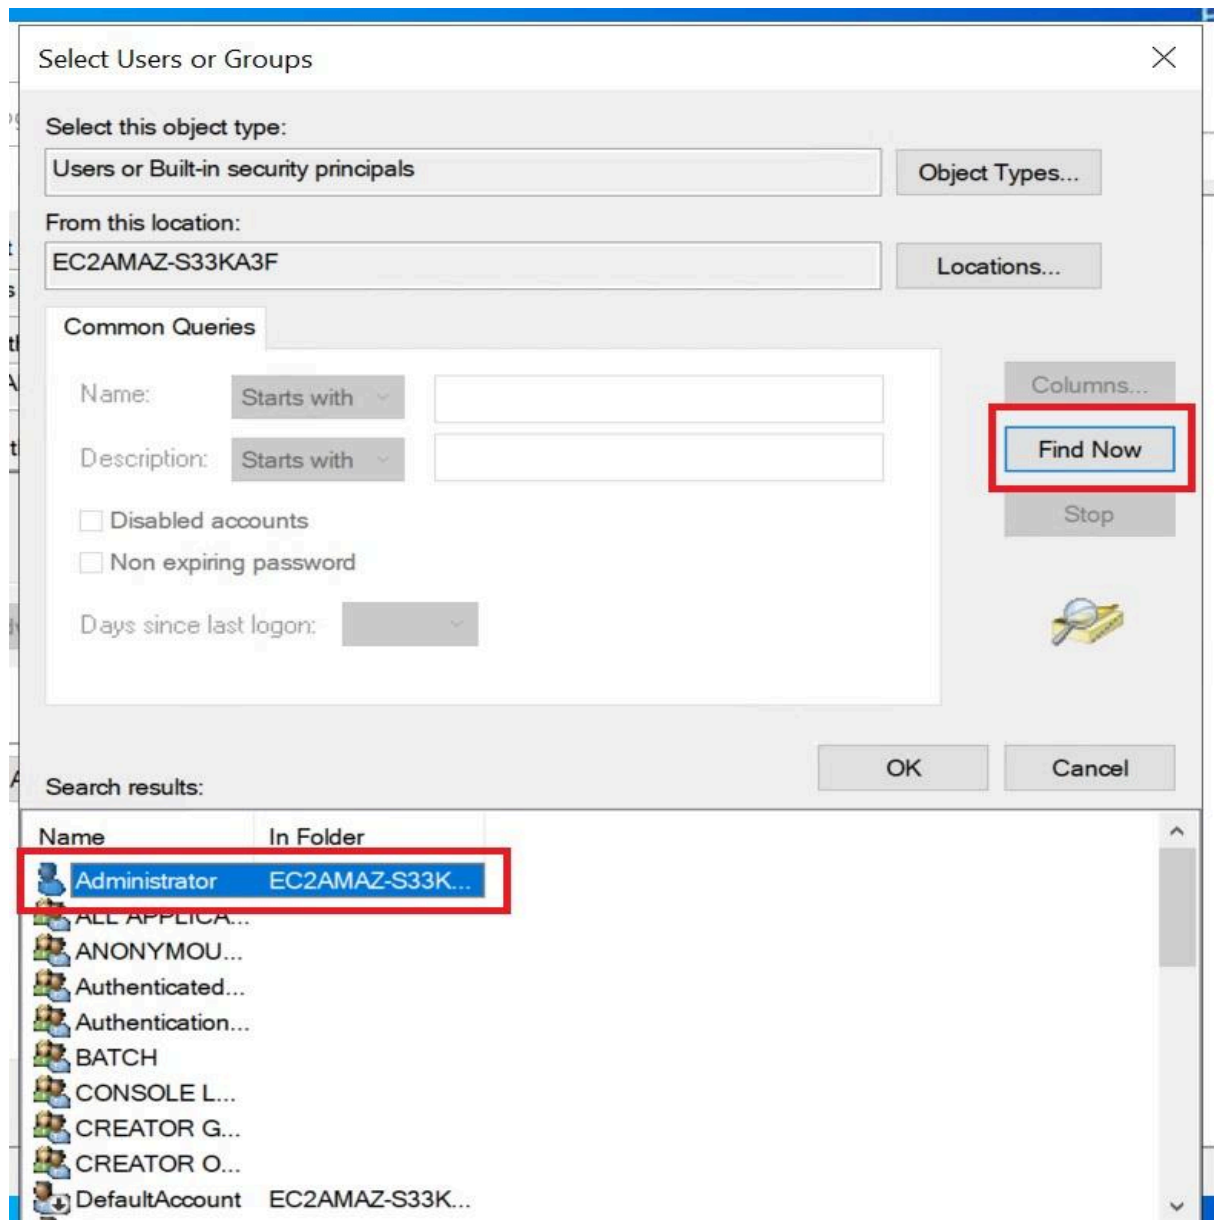

Select Add User or Group:

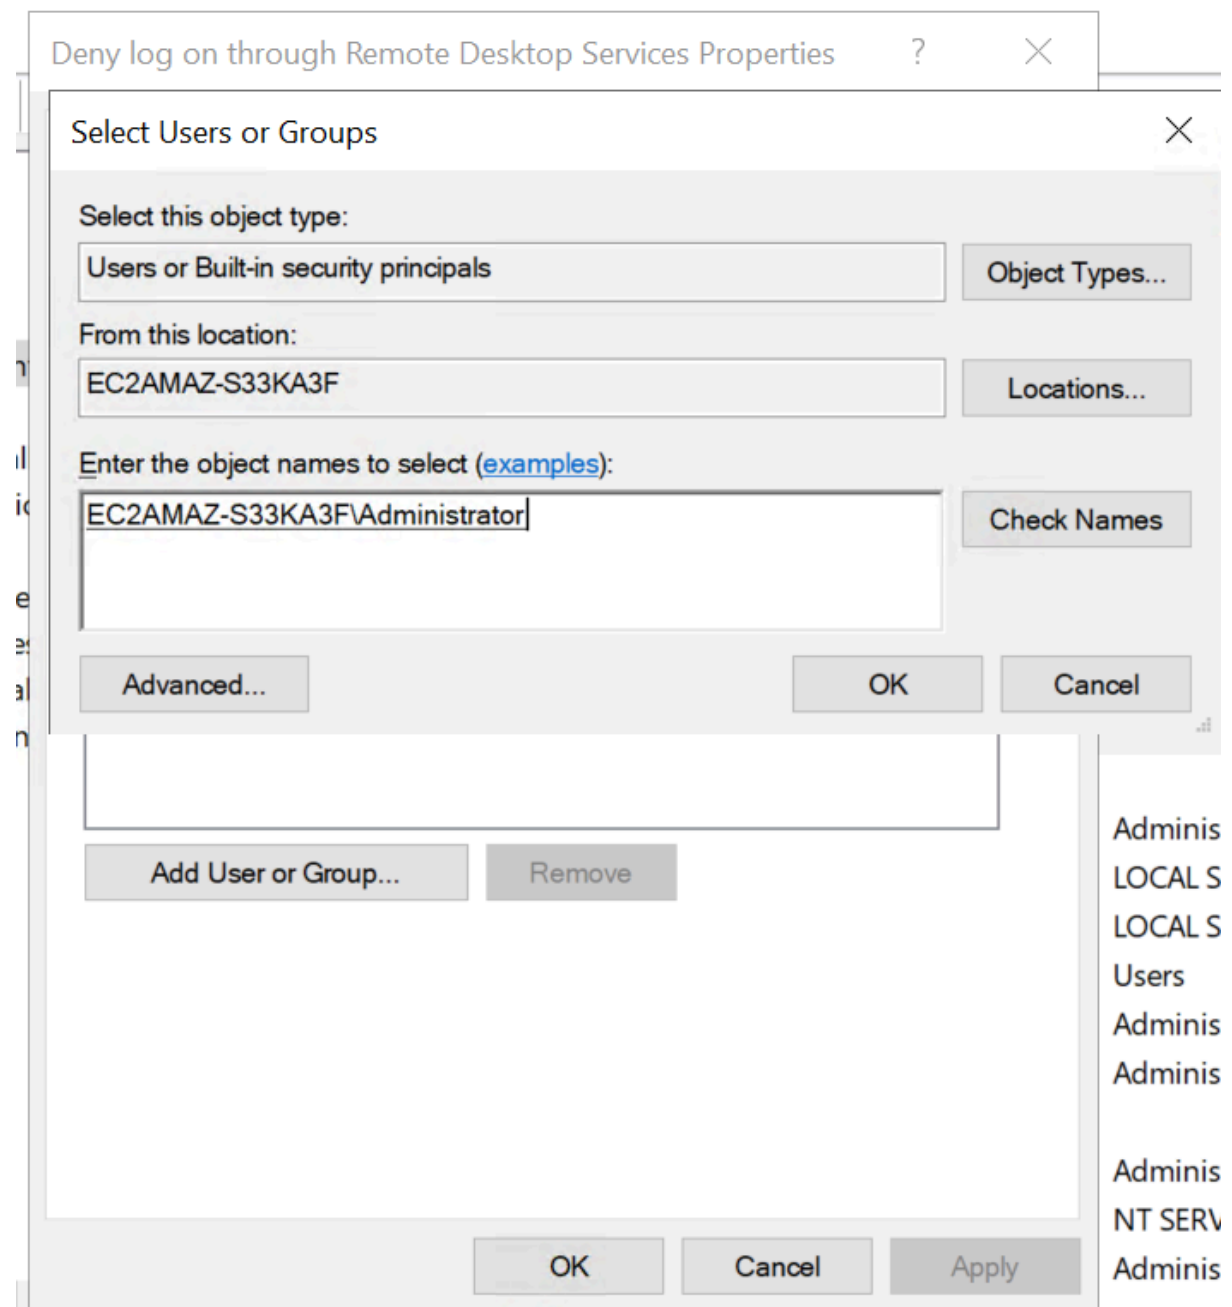

Select Advanced:

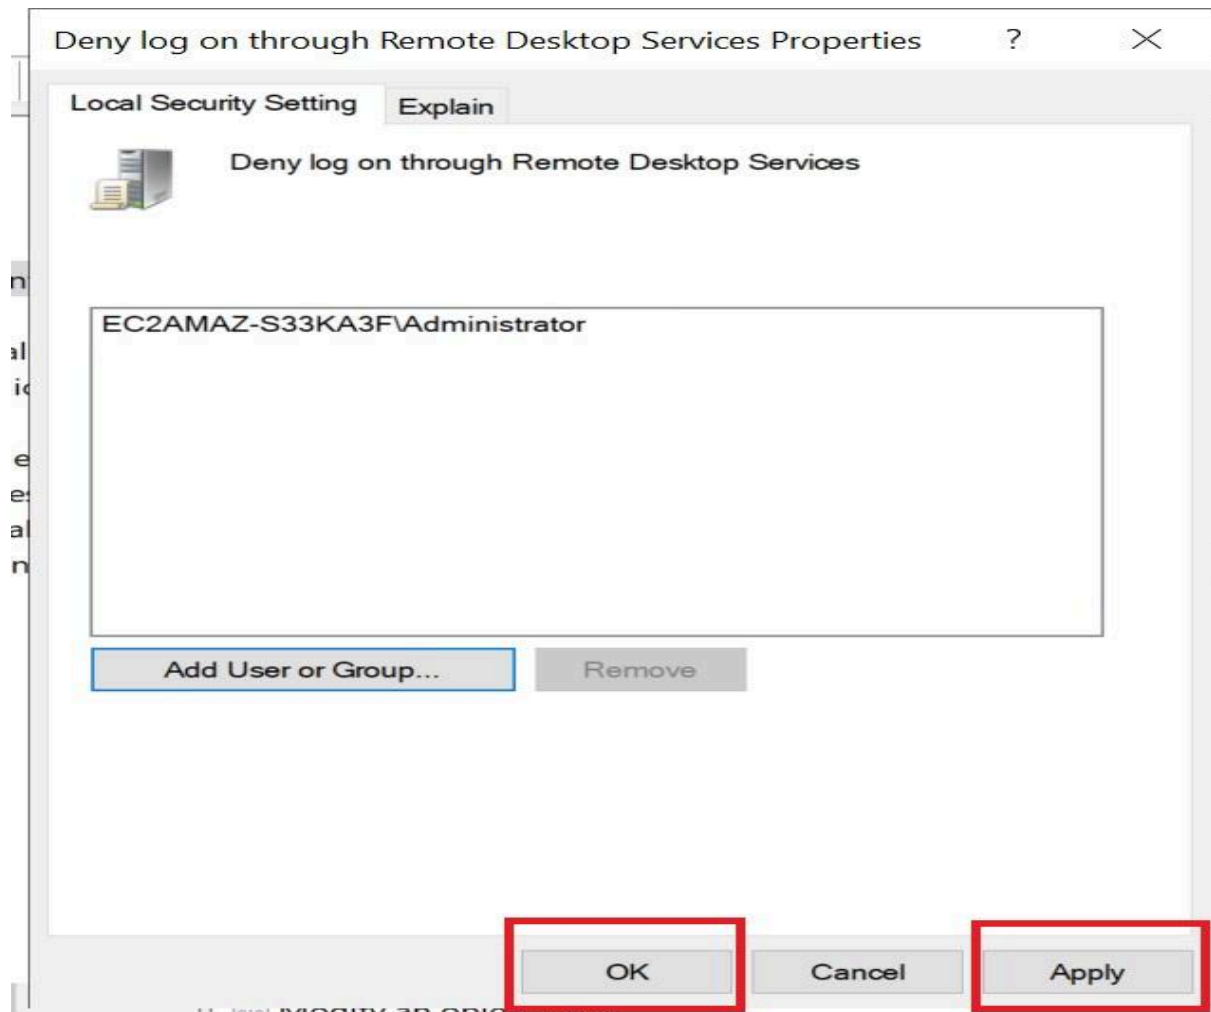

Select administrator account:

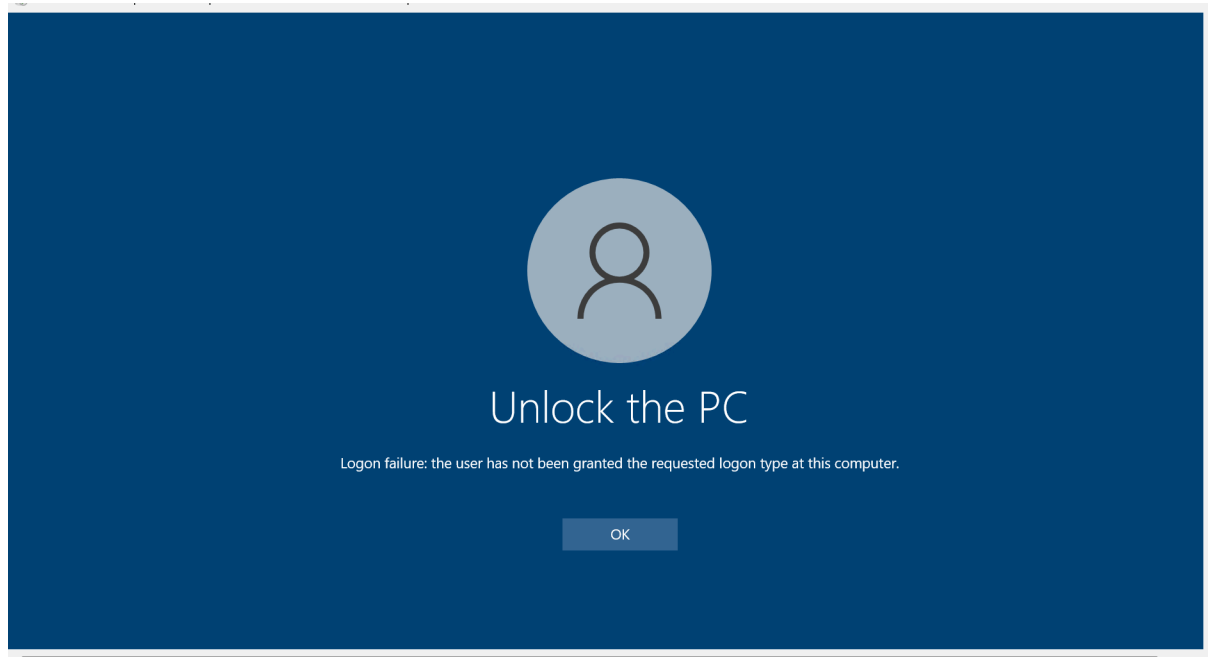

Click OK:

Press Apply and Okay:

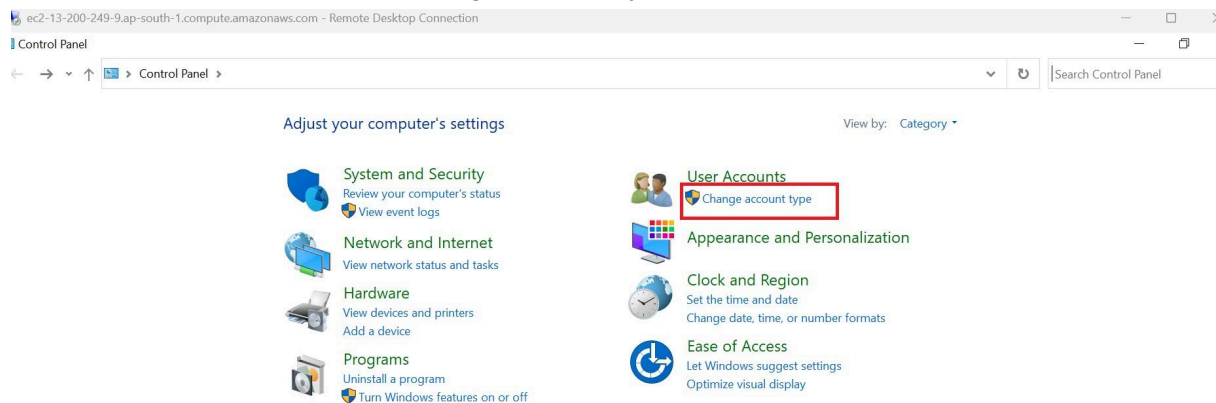

Test admin login on rdp:

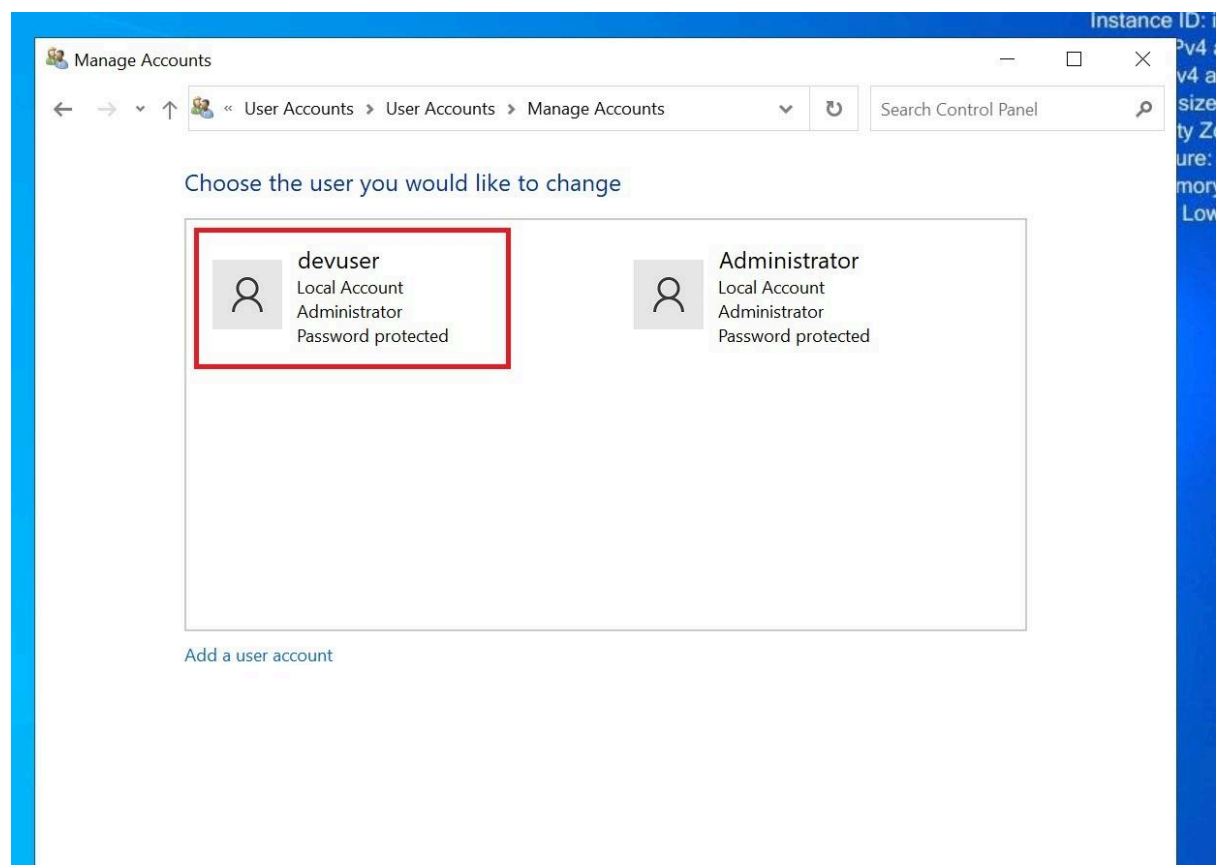

Change Window username:

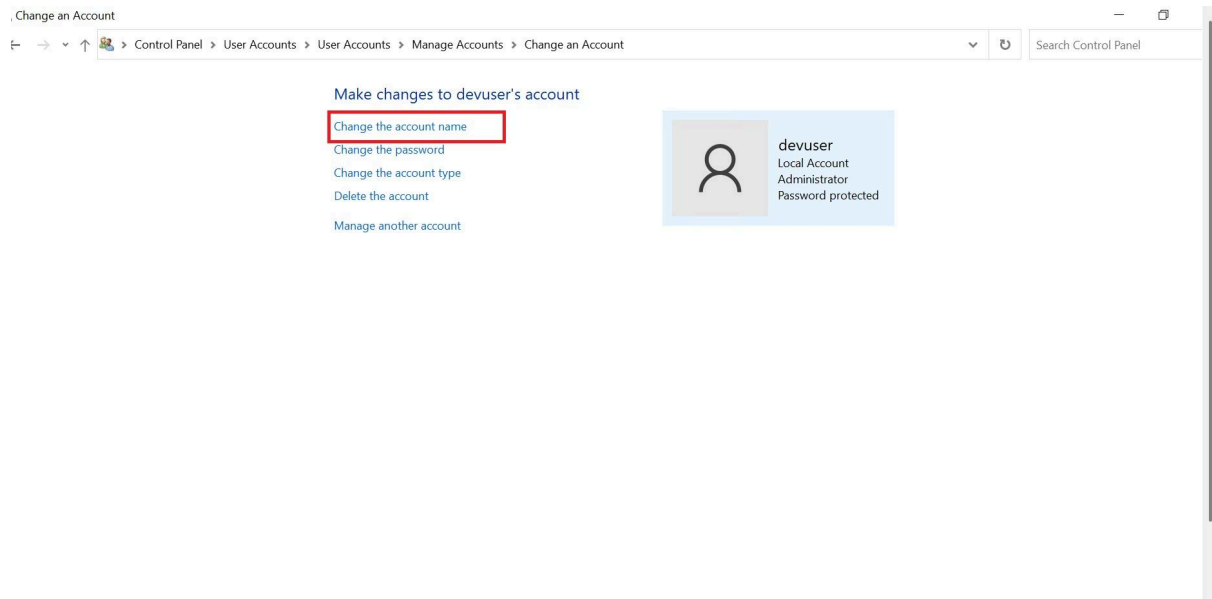

Open control panel and select change account type:

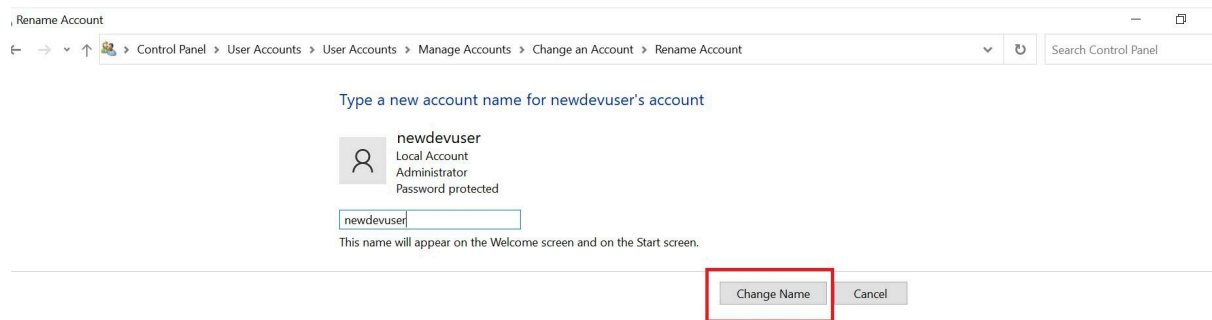

Select devuser:

Select Change the account name:

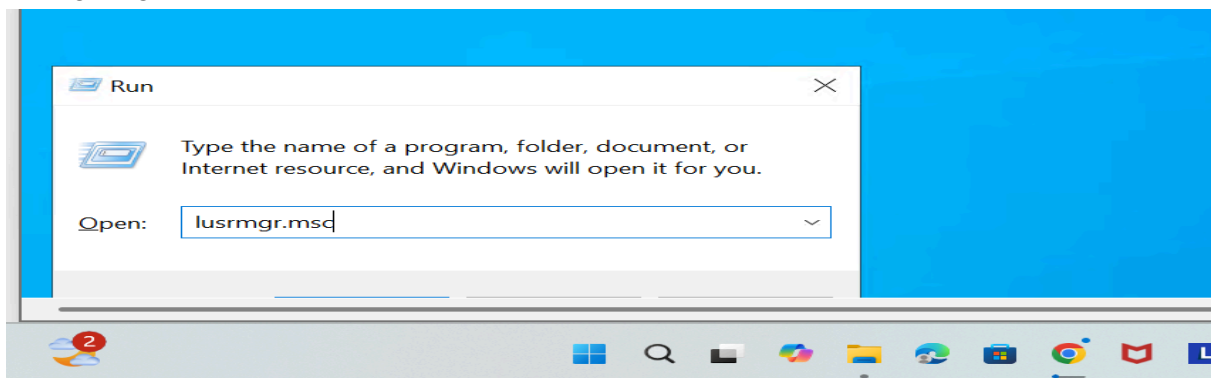

## Add New name:

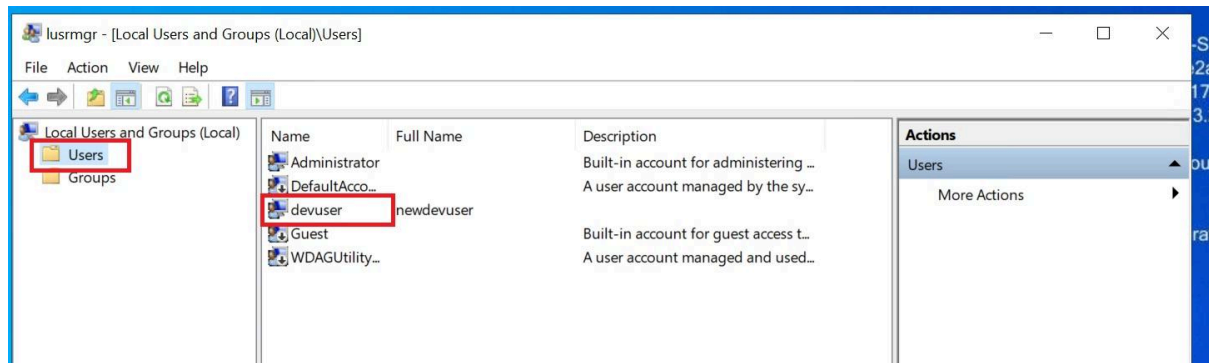

With Control Panel we can only change the display name:

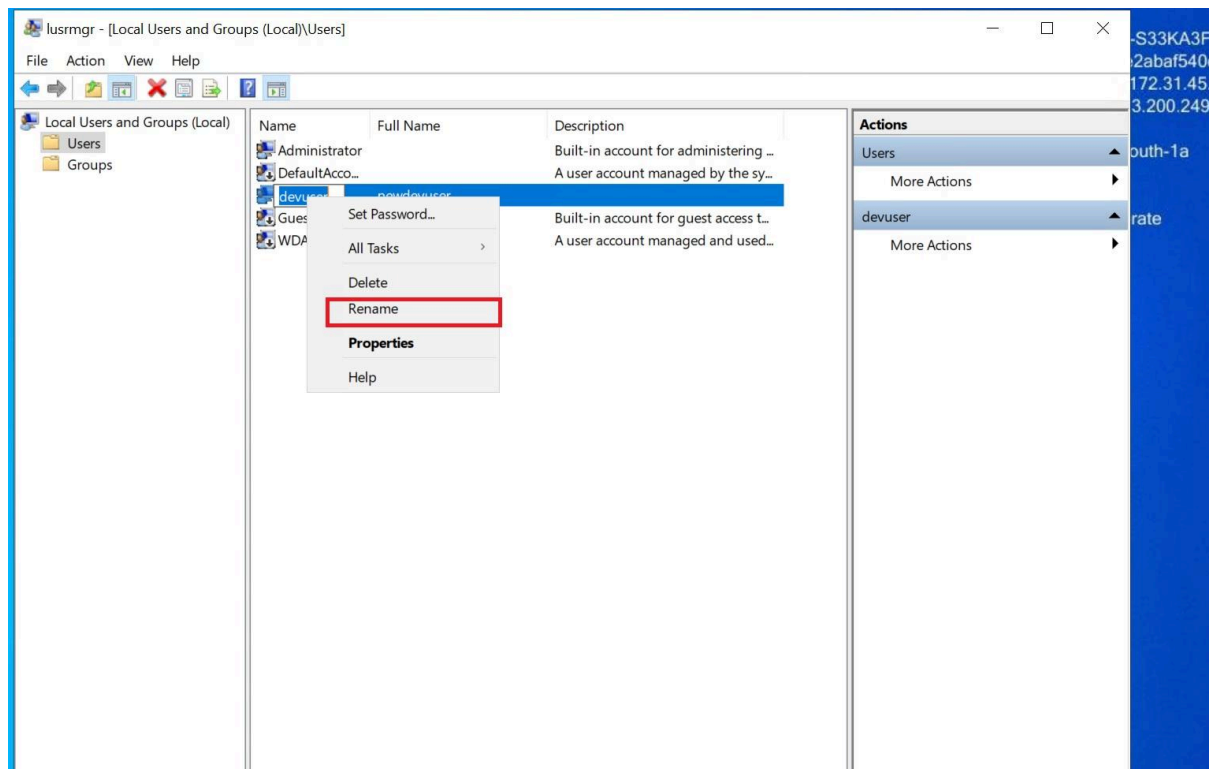

Change login name:

Select the user:

Rename the user:

Logout and test rdp with new user( rdp login working but when I lock the account the newdevuser display login is not working)

This error is solved by rebooting the machine.

Change user password:

Run:

`net user newdevuser blazor3d@123`
